ALUMINUM FENCE

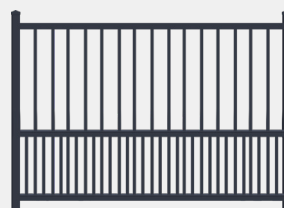

Aluminum fence sections are pre assembled panels that make for easy installation. Each section is able to slope up to 12" which makes it perfect for houses built on inclines.

Residential 2 Rail and 3 Rail are made with 1" x 1-1/8" rails and 5/8" pickets that are screwed together to make a panel. This style of fencing is great for adding a decorative touch to any yard.

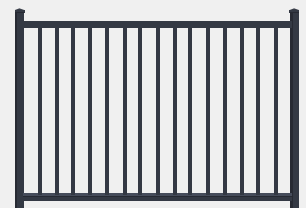

Puppy picket aluminum was made with pets in mind. This style of fencing has 18" of closely spaced pickets to prevent our furry friends from roaming unsafe areas.

Commercial aluminum fence sections are made with 1-1/4" x 1-1/4" rails and 3/4" pickets. The thicker material helps reinforce the fence and prevent anything from pushing through the bars.

Additionally, all styles can be designed as rake bottom.

CHAIN LINK FENCE

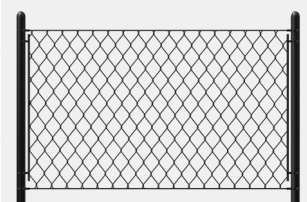

Chainlink fences are our most cost effective option to fencing. Not only is the material 100% American made, but we also have 4ft, 5ft and 6ft heights in galvanized and black readily available and instock.

Here at Western Fence Supply, we sell every piece of the fence individually from the Chainlink wire, top rail and posts to the bands, caps and screws used to connect everything together. By doing this we help make doing fence repairs less of a hassle for homeowners and easier to manage for contractors.

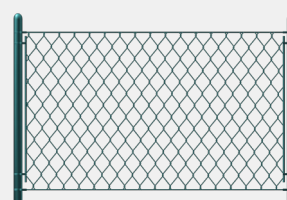

We are expert fabricators of custom chain link gates: rolling, sliding, cantilever gates available. Commercial and industrial grade material with little to no wait time.

METAL FENCE

Privacy metal fencing, also known as Dura Fence, is one of Western Fence Supply's best sellers. This material mainly consists of 7" wide x 6ft high metal pickets, 1" x 2" x 24ft long metal rails and 2-1/2" x 8ft long metal posts that are all put together using screws. We offer this material in powder coated White and Dark Bronze or galvanized steel. Just like the chainlink, this material is also sold separately. We are also able to custom make any size gate for this material from the standard swing gates to sliding v-track gates in as little as 3-4 business days.

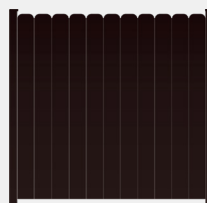

All fencing components available for manufacturing this fence in horizontal style.

VINYL FENCE

Vinyl privacy fence sections are a perfect product to use if you want to enclose your backyard and create a safe environment for your family to enjoy your pool or other outdoor activities. This style of vinyl fence is comprised of two pocket rails, eleven tongue & groove pickets, and two u-channel; finished panels are assembled by snapping the rails into routed holes in five-inch square posts, then sliding each picket together and then into the pocket of each rail.

Vinyl privacy fence panels are the most common form of PVC fence. Since this does not fall under the category of specialty products, there is no wait as material is in stock. This style is available in heights from 2' to 8', widths from 6' to 8' and in white tan and gray(in limited amounts) that you can view below.

Sections DO NOT come pre assembled or to be built on site. Suitable for straight and sloped yards.

Specialty gates available.
